Re: Cleaning Work Plan Submittal
North and South Treatment Plants, Site 78
Contract N62470-93-D-3032; Delivery Order 0118
MCB Camp Lejeune, NC

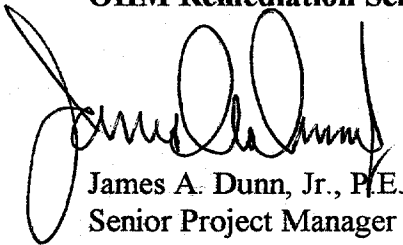

Dear Ms. Landman:

Submitted for your review and approval is the attached Work Plan for Systems Cleaning for the North and South Treatment Plants at Hadnot Point, Site 78, MCB Camp Lejeune, N.C. This plan has been devised to conform with the request for Quotation and our proposal.

Our technical staff is currently reviewing the drawings and Operation and Maintenance Manuals for the plants provided by O'Brien and Gere. We anticipate mobilizing to the site in mid-October to commence the cleaning operations. Prior to the cleaning and upon approval of this Work Plan, OHM will procure samples from various points within the treatment train to test for chemical efficiency of the treatment elements. Operational testing for mechanical efficiencies will be performed subsequent to the cleaning operations. We anticipate that the cleaning and major maintenance of the two plants will require a one month period for performance.

We have provided copies of this Draft Work Plan to the base operating personnel for review and comment. Please forward all review comments to my attention for receipt by October 7, 1996. Thanks in advance for your cooperation.

Very truly yours,
OHM Remediation Services, Inc.

James A. Dunn, Jr., P.E.
Senior Project Manager
